Richtlinien für Ersatzteil (ET)-Bestellungen

Ersatzteil-Bestellungen sind über den zuständigen Händler einzureichen und müssen folgende Angaben enthalten:

1. Maschinentyp und Fahrgestell-Nummer
2. Teile-Nummer und Benennung der gewünschten Ersatzteile
3. Menge der gewünschten Ersatzteile
4. Versandadresse mit Postleitzahl
5. Gewünschte Versandart (Bei Bahnversand auch Bestimmungsbahnhof)

Die Abbildungen in der Ersatzteilliste oder dem Mikrofiche entsprechen nicht immer genau dem Original Teil.
Dieses kann sich im Zuge von Verbesserungen nach Fertigstellung der ET-Unterlagen geändert haben.

Für Teile, deren Bestell-Nummer nicht mit Sicherheit festgestellt werden kann, ist zur Vermeidung von Falschlieferungen ein Musterteil einzusenden.

Nicht zurückverlangte Muster werden verschrottet.

Frühzeitige Instandsetzung der Maschinen und Geräte schon im Winter, ersparen Zeit und Geld.

Bitte beachten Sie:

...daß Neuauflagen von ET-Listen oder Mikrofiches vorher erschienene Auflagen ersetzen. Die neuesten ET-Listen bzw. Mikrofiches beinhalten alle technischen Änderungen, die seit Baubeginn durchgeführt wurden.

...daß ET-Listen und Mikrofiches-Neuauflagen infolge unterschiedlicher Aufbereitungszeit nicht gleichzeitig erscheinen.

Hinweise auf Hydraulik-und Gelenkwellenteile

Bei Reparatur von Hydraulik-Zylindern und -Geräten empfehlen wir, nur Dichtungsteile auszuwechseln.

Bei allen übrigen Teilen wollen Sie Zylinder bzw. Geräte anfordern.

Profilrohre, Schutzhälften und Schutztrichter sind beim Einbau auf erforderliche Länge zu kürzen.

Wichtig: Verwenden Sie nur Original-Ersatzteile, die in unseren Werken stets nach der gleichen Methode hergestellt werden und gutes Passen sowie hervorragende Güte garantieren.

Bedeutung der Symbole,
die in dieser ET-Dokumentation
verwendet werden.

Directives for Spare Parts orders

Orders are to be addressed to the competent dealer, and should include the following specifications:

1. Machine type and chassis number
2. Part number and designation of desired parts
3. Quantity desired
4. Exact address with PZN
5. Forwarding instructions

The illustrations given in Spare Parts Lists and microfiches do not correspond always to the original part since it could occur that the latter has been modified after the ultimate impression of the List.

For parts whose order number cannot be found out, you should enclose a sample in order to avoid any wrong delivery.

No reclaimed samples will be scraped.

Early maintenance works, already during Winter, save time and money.

Please note:

Reprints of Spare Parts Lists or new microfiches replace former editions. The new lists and microfiches include all technical changes introduced during the whole development of the machines concerned.

Spare Parts Lists and microfiches cannot issue simultaneously, due to different times being required for elaboration.

Tips on Hydraulics and P.T.O Shaft Parts

In case of repair of a hydraulic cylinder or control apparatus we recommend to replace the packings only.
For all other parts, please make request for an exchange cylinder or control apparatus.

When fitting, shorten to the required length profiled tubes, protection tubes and funnel shaped guards.

Important: Please use exclusively original spare parts which are always manufactured according to the same process and thus ensure perfect matching and excellent quality.

Directives pour la commande de Pièces de Rechange

Des commandes doivent être adressées au concessionnaire compétent. Elles doivent contenir les indications suivantes:

1. Type de machine et numéro de châssis
2. Numéro de pièce et désignation des pièces désirées
3. Quantité désirée
4. Adresse avec code postal
5. Mode de livraison désiré
Lors d'une livraison par chemin de fer, indiquer également la gare de destination.

Les illustrations reproduites dans la liste de pièces de rechange et sur la microfiche ne correspondent pas toujours exactement à la pièce originale, étant donné que celle-ci peut avoir été modifiée après l'impression définitive de la liste.

Au cas où vous ne pourriez pas déterminer précisément le numéro d'une pièce, nous vous conseillons d'ajouter à votre ordre un échantillon pour éviter des livraisons incorrectes. Des échantillons qui n'avaient pas été réclamés, sont mis à la ferraille.

Si vous effectuez les travaux d'entretien déjà en hiver, vous épargnez beaucoup de temps et d'argent.

Veuillez noter les points suivants:

Les nouveaux tirages de listes de pièces de rechange et de microfiches remplacent toutes les listes et fiches antérieurement publiées. Ils contiennent toutes les modifications techniques apportées dès le début de construction.

Les listes de pièces de rechange et les microfiches ne peuvent pas être publiées simultanément, étant donné que leur élaboration ne requiert pas le même temps.

Conseils relatifs aux pièces du système hydr. et des arbres à cardan

Lors d'une réparation des vérins hydr. et des appareils de commande, il est recommandé de remplacer uniquement les pièces d'étanchéité. Pour toutes les autres pièces, demandez un appareil d'échange standard. Pour le montage, raccourcir les tubes profilés, les tubes de protection et la protection en entonnoir à la longueur nécessaire.

Important: N'utilisez que des pièces de rechange originales qui sont toujours produites suivant le même procédé et assurent un ajustage et une qualité excellents.

Directivas para el pedido de piezas de recambio

Los pedidos tienen que ser dirigidos al agente competente, y contener la indicaciones siguientes:

1. Tipo de máquina y número de chasis
2. Número de pieza y denominación de la piezas deseadas
3. Cantidad deseada
4. Senas y número postal
5. Instrucciones relativas a la expedición

En el caso de expedición por ferrocarril, indicar también la estación de destino.

Las ilustraciones reproducidas en la lista de piezas de recambio o en la ficha perforada con microfilm, no corresponden siempre exactamente a la pieza original puesto que esta ultima podia ser modificada después de la impresión definitiva de la lista.

Si Ud. no puede determinar precisamente un número de pieza, adjunte a su pedido una muestra para evitar expediciones incorrectas.

Si efectúa los trabajos de entretenimiento ya durante el invierno, economiza tiempo y dinero.

Tenga Ud. en cuenta los puntos siguientes:

Nuevas ediciones de listas de piezas de recambio o de ficha perforadas con microfilm sustituyen listas o fichas anteriormente publicadas. Contienen todas las modificaciones técnicas introducidas desde el comienzo de la construcción.

Las listas de piezas de recambio y las fichas con microfilm no pueden publicarse simultáneamente, puesto que su elaboración requiere diferentes lapsos de tiempo.

Consejos relativos al sistema hidráulico a los árboles cardán

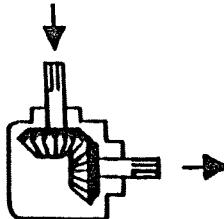

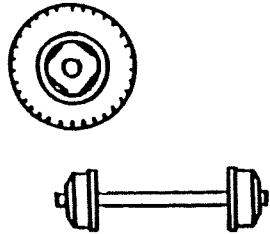

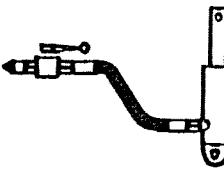

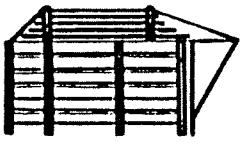

En el caso de reparación de cilindros hidráulicos o aparatos de mando, recomendamos cambiar solamente las piezas de empaquetadura. Para todas las otras piezas, pedir un cilindro o aparato de recambio.

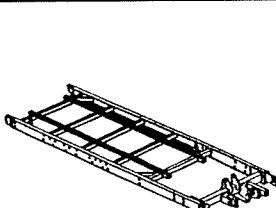

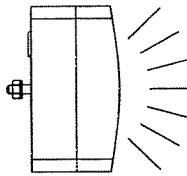

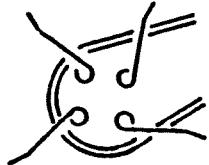

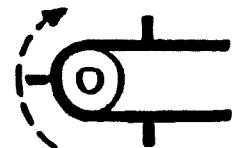

Para el montaje, acortar los tubos perfilados, los tubos de protección y la protección en forma de embudo a la longitud necesaria.

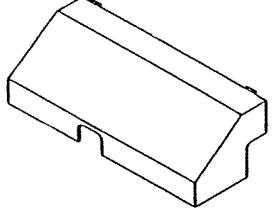

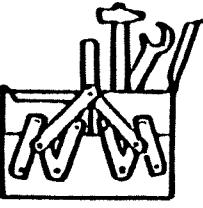

Importante: Emplee Ud. siempre piezas originales que son producidas siempre según el mismo método de fabricación, y le aseguran, por consiguiente, un ajuste y calidad extraordinarios.
